

CONNELLSVILLE, PA., SATURDAY EVENING, MAY 24, 1924.

**EVERYTHING READY
FOR THE COMMUNITY
MEMORIAL SERVICE**

**Needs Only Fair Weather and
Presence of Citizens to
Insure Success.**

ALL VETERANS TO ATTEND

The only things necessary to insure the largest success of the Community Memorial Services, to be held under the auspices of Milton Lafayette Bishop Post No. 391, The American Legion, in the High School Auditorium tomorrow evening at 7:45 o'clock is fair weather and the presence of citizens in numbers proportionate to the importance of the occasion.

Every detail in connection with the service has been completed by the committee in charge. The order exercises presents features that will appeal to all. The numerical number

will be furnished by Mrs. Fred Fiedler and Miss Chris-tine Davis, two of the best known vocalists of the city and by Kiefer's orchestra. Rev. J. Dorman of Trinity Reformed Church will offer the invocation; Rev. Dr. H. Hetrick of Trinity Lutheran Church, will offer the prayer and R. L. H. Stevens, of the First Baptist Church, will pronounce the benediction. The opening address will be made by Past Post Commander N. C. Flore who will also introduce St. Commander J. Leo Collins, the speaker of the evening. The roll call

deceased soldiers will be called
James J. Ryland, adjutant of Bishop
Post. Horace Atkins will con-
"Tape."

All the veterans' organizations
the city will attend. The members
of the Grand Army of the Republic
will assemble at their headquarters
the members of Walter E. Brown
Veterans of Foreign Wars, the
semble in front of the Solomon The-
ter at 7 P. M. and the member
Bishop Post of the Legion will
assemble at post headquarters at
same hour. All veterans will
march to the High School and be
ed in a reserved section.

Members of The American Legion Auxiliary will assemble in the gymnasium of the high school at 7:30 and will be seated in a reserved section. Members of the Howitzer Company, 3rd Infantry, Pennsylvania National Guard, will assemble at the armory at 7 o'clock in civilian dress and march to the high school.

**Barnyard Golfers
Pave Way for First
Matches on Tues**

At a meeting of the Inter-Horsehoe League Friday night the First Presbyterian Church regulations and the schedule for the season were adopted. The season will open next Tuesday night and will continue for a period of nine weeks, closing on the 24th. As heretofore the games will be played on the State Armory grounds.

and will begin at 6:30 o'clock. The first two games will be on Tuesday and Thursday nights. The teams will be allowed to select 10 and 10 men will play each game. The names of all persons entering the various teams must be handed in to the secretary, Braden H. Chubb, by next Monday night, as no change will be made after that date. The closing of the season will be in June by a turn road. The two teams will furnish the cars. I will bear the expense, and will be connected with the event.

The open court contract will be between the First Presbyterian and Christian teams. Churches

sent in the league are: First
byterian, Christian, First
Trinity Lutheran, Mrs. M.
Episcopal, First Methodist
ant, United Presbyterian and
Brethren.

**Gary Reveals Threat
To Nationalize Steel
Industry During**

NEW YORK, May 24.—The Government proposed at the

the war to take over the steel industry, and that the replied it would not calmly to nationalization, were revealed by Elbert H. Gary at which brought to a close a general meeting of the American and Steel Institute, of which

Forecast Mr. Gary intimated the nation plan was the idea of W. McAdoo.

Will Take Lots of Rain to Prevent County Scholastic Track Meet Today, Is Edict

Preparations Are Complete for Holding of Annual Event at Dawson.

MANY SCHOOLS ENTERED

Rain threatened this morning to interfere with the third attempt of the Fayette County Scholastic Athletic Association to hold its annual track and field meet at the Dawson Fair grounds. The event had already been postponed twice, first on May 10 and then on May 17. It was said it would take a good deal of wet weather to force the association to call off the event once more.

Connellsville athletes are anxious to get in action at Dawson. The boys have trained steadily under Coach J. E. Lerow and are in the prime of condition. The relay team looks especially good and would have been in the running. It is composed of Shuler, May, Runnack and Carter. There are other events in which Connellsville could have hoped to take points. Johnny Ross is ready to duplicate his stunt of last year and capture the broad jump.

SCOTSDALE WILL PLAY GAMES NEXT WEDNESDAY AND ON MEMORIAL DAY

There will be baseball games at Scottdale next Wednesday and on Memorial Day. On Wednesday the Homestead Grays will be in the Mill Town and on the holiday the Seelye Termites will appear.

This afternoon the Scottdale club is playing Charleroi, one of the leading clubs in Western Pennsylvania.

Pirates Lose Once More.

New York Giants, defeating Cincinnati yesterday, climbed back into first place in the National League. Pittsburgh is still sixth, losing another yesterday to Brooklyn, 3-1.

The Brooklyn Dodgers are now in third place, going ahead of Cincinnati. The Reds were purchased on top a few days ago.

Walter Johnson of the Washington Americans yesterday held the Chicago White Sox to one hit, a single in the fourth frame. The final score was 1-0. With 14 strikeouts in the game he, boosted his total for 15 years to 218.

The Connellsville Independents were counting on playing a game with Charleroi on Monday evening, but no announcement had been made this morning whether the contest was scheduled or not. When Charleroi does play here it will be an opportunity to see a team in action which scored victories last season over the best independent circles.

"Jumbo" Rippon of Greensburg, who played out for the Toronsburg last fall, was on the Coker bench Thursday as a visitor. "What's the matter with this town?" he wanted to know. "There should be 10,000 people here."

He expressed a wish that he had such a closed ball park for his club in the Westmoreland county seat. At his first game this week, played Wednesday, there were 3,000 persons.

There is one thing about the baseball being offered here. It is not second rate. The "grays" crew is meeting only the best attractions obtainable and when his team wins a game, it is over a worthy foe.

Carroll is quick as a panther in snaring ground balls near him. He literally pounces on them and they seldom get away.

The Colors may play Charleroi here on Monday. If they do it will be a headliner as Charleroi has a team that last year beat the best in semi-pro circles, making an enviable record. Charleroi is at Scottdale Saturday.

The Hill Top Pirates will open their season Saturday at 10 o'clock with the River Rais, also of the West Side, at the "ex" field. The Pirates want to book games with 12-15 year old teams. Write John Gringo, 249 North Twelfth street.

The Olympic Juniors will meet the strong Hill Top also of the West Side Tuesday evening at 6 o'clock in Fayette field. The Olympics wish to book games with any fast-class teams, or out of the city limits. Write Wm. Jefferson, 117 South Seventh street, city.

Want a Position? Apply for on through our classified columns. One cent a word.

Large Crowd Sees Meet at Perryopolis

Fifteen hundred persons, it was estimated, attended the long-delayed field and track meet of the Perry Township High School at Jamison Field at Perryopolis Friday. The events began in the morning and ran over into the afternoon, the day's program ending with a ball game.

Principal E. L. Deppa of the high school, Principal John D. Christman of the grade schools and Township Supervisor E. I. Ramsler were in charge.

Women of the Methodist Episcopal Church served lunches at noon, on the grounds. The crowd was swelled after noon.

Winners of events were: The contest was between the Thesians and Phillos, the Thesians scoring 21½ points, the Phillos, 10.

Running high jump, Rankie, Thesian, first; Russell Blair, Phillo and Roy Eikenburgh, Thesian, tied, distance four feet, 10 inches.

Running broad jump—L. Korte, Thesian, first; Robert Thraasher, Phillo, second; Rankie, Thesian, third.

100-yard dash—Emma Brown, Thesian, first; Ruth Davis, Phillo, second; Robert Thraasher, Phillo, second; Russell Blair, Phillo, third.

Pole vault—Russell Blair, Phillo, first; Rankie, Thesian, second; Thraasher, Phillo, third.

Shot-put—Rankie, Thesian, first; Keffer, Thesian, second; R. Hixon, Thesian, third.

Half-mile run—Larson, Phillo, first; Legley, Phillo, second; A. Mardis, Thesian, third.

Quarter-mile run—Rankie, Thesian, first; Thraasher, Phillo, second; Larson, Phillo, third.

Running broad jump—Emma Brown, Thesian, first; Vera Coldren, Thesian, second; Beasie Knox, Phillo, third.

50-yard dash—Emma Brown, Thesian, first; Vera Coldren, Thesian, second; May Lavshaw, Thesian, third.

100-yard dash—Emma Brown, Thesian, first; Ruth Davis, Phillo, second; Beasie Knox, Phillo, third.

Running high jump—Ruth Davis, Phillo, first; Emma Brown, Thesian, second; Vera Coldren, Thesian, third.

Perryopolis grade schools won the volleyball match from Star Junction, taking two out of three games.

Whitson defeated Star Junction in the morning baseball game, 3-2, and captured the afternoon game from Perry High, 4-5.

DIAMOND PICK-UPS

Umpires' troubles have begun in earnest.

Called strikes were first introduced in baseball in 1828.

Pitcher Earl Whitehill appears to be the ace of the Detroit pitching staff.

The Cincinnati "Red Stockings" was the first professional baseball club in the United States.

Jack Bentley, former Baltimore scouppaw, is expected to be one of Giants' star men this season.

Pitcher John Wilson has been turned out to the Bay City Michigan-Ontario team by the St. Louis Browns.

Shortstop Ray French was obtained by the White Sox from Brooklyn. He was claimed when waivers were asked.

Leo Dixon, catcher with Indianapolis of the American association, has been purchased by St. Paul of the same league.

The Boston Red Sox have sent Outfielder John Donoghue and Pitcher Harry Butler to the Waterbury club of the Eastern league.

Kenneth Hogan, recruit outfielder, has been turned out by the Cleveland club to the Hamilton club of the Michigan-Ontario league.

Potter Palmer, the millionaire merchant and hotel owner, was president of Chicago's first professional baseball club, which was organized in 1890.

Joe McGinnity, known as the "Iron Man" of the diamond, pitched more than 1,500 games during his 30 years of service in professional baseball.

To insure good behavior, Babe Ruth's contract with the New York Yankees provides that half his salary shall be held out on him until the end of the season.

Richards Will Write in Spite of Ruling

Vincent Richards, following his victory in the national indoor tennis championship, stated that his views on the tennis play-

writer question were substantiated by the same as those of Bill Tilden, and that if it came to a choice between writing and amateur tennis next season he probably would follow Tilden's lead and continue to write.

He expects to be released from his present writing contract in time to be eligible for the American Olympic tennis team, but at present he has every intention of resuming as soon as the international event in France is over.

"LEST WE FORGET"

Whether the Community Memorial Service for the soldier dead, to be held in the High School Auditorium tomorrow evening at 7:15 o'clock, becomes truly representative of the sentiment of the people of this community, depends almost entirely upon the people themselves.

If they fail, apathy or indifference to avail themselves of this opportunity to join with the near relatives, comrades and friends in doing honor to the memory of those who fell in battle, died of wounds or have since succumbed to disease contracted in the service of their country, the exercises will fall far short of what they should be as a community memorial service.

The memorial committee of Milton LaFayette Bishop Post which has the affair in charge, has arranged an order of service and completed every detail necessary to make the occasion appropriate and impressive in all its features and appointments. Very cordial invitations have been extended to the churches, organizations and the public at large to be present in order that on this, the one night in the year set aside for paying tribute to the honored dead, they may foregather as loyal and patriotic citizens and as neighbors and friends to join in a simple but sincere expression of respect and esteem.

If for any reason there is not a large attendance at this service it can be interpreted as meaning that we do not realize that we have an obligation which we owe to ourselves, to the living generation and to the community to discharge. Our absence will also mean that we have failed to appreciate the privilege which we ought to prize "Lest We Forget" those who have given their lives that the nation might live and that civilization be preserved for all the world.

SETTING AN EXAMPLE ON SUNDAY OBSERVANCE

In his sermon last Sunday a local pastor declared there would be much less violation of the Sunday laws by churches and similar establishments if American citizens would refrain from visiting these establishments their patronage on Sunday.

The idea expressed by this pastor has been given somewhat different and more definite form by the Presbyterian Ministerial Association of Philadelphia. At a recent meeting of this body there was an extended discussion of the means whereby the observance of Sunday laws can be made more effective. The consensus of opinion was that professing Christians can themselves furnish a good example in this direction by staying out of front shops, drug stores, ten-cent stores and similar places from opening on Sunday and thus refrain from "congregating" in forms of amusement and recreation before they can "constantly" oppose other forms of Sabbath non-observance on the part of non-Christians.

The attitude of the association was given formal expression in the following resolution: "The Presbyterian Ministerial Association hereby expresses its belief and earnest request for the Sabbath and religious observance by a community can only be secured when the Christian people of the community are faithful thereto; that if members of churches are found purchasing commodities in drug stores and other stores and are visiting ice cream parlors and engaging in forms of amusement and recreation on the Sabbath, they cannot with any degree of consistency, oppose other forms of Sabbath non-observance on the part of non-Christians."

The Queen of May has but a week of her glorious reign before she must abdicate in favor of the June Bride and the Sweet Old Graduate.

Can there be a more sacred Sunday evening service than a memorial for the dead?

Licensed in Uniontown
Bryan Collier and Mary Reiter, both of Dunbar, John Perkin of Dunbar, Arthur Warren of Mount Braddock and Viola Morgan of Hopwood, George Samuels of Lenont and Kathryn Stokes of Uniontown, were licensed to wed in Uniontown.

CHARGE PLOT TO "FRAME" SENATOR.

W. C. Dreikstein, confidential adviser to Edward B. McLean, owner of the Washington Post, and his wife, Mrs. Mary Dreikstein, confidential stenographer in the Department of Justice, started the Senate Committee investigating the Department by alleging there was a plot to "frame" U. S. Senator Burton K. Wheeler, of Montana, chief prosecutor. They further testified that the famous diaries of Gaston B. Moore, or investigator in the Department, had been stolen by agents who purported to represent H. C. Todd, special assistant to former Attorney-General Henry M. Duggan.

A Great Record of Accomplishment

WASHINGTON, May 23.—(Special correspondence).—The Democratic nomination in the Senate that has so long delayed effective legislation by that body might well look over the record of the executive branch of the government since the Republicans came into power on March 4, 1921. The results accomplished toward improving the position of the United States in the family of nations, contributing to the maintenance of world peace, and hastening the return of this and other countries to a state of normalcy following the war, offer a record of constructive diplomacy perhaps never before equaled in American history.

Treaties of peace with Germany, Austria and Hungary, delayed by the Wilson administration for two and a half years, were finally completed and ratified. A convention with Germany was concluded for the settlement of war claims of American citizens. A treaty was negotiated with the new government of Turkey. Extradition treaties were ratified with Estonia, Latvia and Lithuania. The arbitration convention of 1908 was extended with Great Britain, France, Japan, the Netherlands, Norway and Portugal. A treaty with France recognized the rights of Americans in Togoland and the Cameroons, as did also a treaty with Belgium relative to part of the former German colony of East Africa.

A plan for the repatriation of the American army of occupation on the Rhine has been agreed to.

Arrangements for the refunding and

eventual repayment of the debts owed the United States by Great Britain, Finland and Hungary have been completed, and other debtor countries are taking similar steps. An understanding with Great Britain has been reached for the extension of the three-mile limit of territorial waters to nine miles in the breaking up of the rum traffic. A settlement of the long-standing representation problem was concluded and found expression in the Dawes Commission and its report.

The Washington Armaments Conference brought forth treaties limiting naval armaments, land fortifications and the use of submarines and poison gases in warfare; removing disagreements with Great Britain, France and Japan concerning Pacific Island possessions; settling forth principles to be followed by the powers in matters concerning China; and revising the Chinese customs tariff so as to increase the revenues of China.

In the Western Hemisphere similar notable results have been achieved. The long drawn out controversy with Colombia was brought to a satisfactory conclusion. The difficulties with Mexico were finally brought to an end, largely through good offices of President Harding with President Obregon, and a convention was signed for the adjustment of American claims against that country. A way was found to arbitrate the 16-year old border dispute between Chile and Peru, involving the Atacama territory, and President Coolidge, as final arbitrator, is now sitting in judgment on the case.

Economic chaos and possible civil war were averted in Cuba through the sending of General Crowder to the island. Haiti was rid of its lawless element, and the Haitians assisted to form a new constitution and prosper. A boundary dispute between Costa Rica and Panama was prevented.

Agreements among the Central American Republics were obtained, whereby their armaments were limited and frontier disputes referred to arbitration.

In its conduct of international affairs, the executive branch of the government has been a model of constructive efficiency. Fortunately it was not handicapped, as the Republics of the Congress have been, by the political contentions of the legislative branch. The remarkable record of the executive branch of the government in the past year provides the Republicans with a working majority in that department.

Dunbar Township High Class Poem

The following composition by Miss Ruth Ketter, member of the graduating class of the Dunbar Township High School, was read in connection with the class exercises Friday afternoon.

Like a smoldering heap of dead embers that lie on the humble hearth, waiting for a spark of inspiration, the human mind is waiting for the spark of inspiration. It is the spark of inspiration that makes the difference between a man and a machine. It is the spark of inspiration that makes the difference between a man and a machine. It is the spark of inspiration that makes the difference between a man and a machine.

Like the subtlest of flowers, the human mind is waiting for the spark of inspiration. It is the spark of inspiration that makes the difference between a man and a machine. It is the spark of inspiration that makes the difference between a man and a machine. It is the spark of inspiration that makes the difference between a man and a machine.

Like the subtlest of flowers, the human mind is waiting for the spark of inspiration. It is the spark of inspiration that makes the difference between a man and a machine. It is the spark of inspiration that makes the difference between a man and a machine. It is the spark of inspiration that makes the difference between a man and a machine.

Like the subtlest of flowers, the human mind is waiting for the spark of inspiration. It is the spark of inspiration that makes the difference between a man and a machine. It is the spark of inspiration that makes the difference between a man and a machine. It is the spark of inspiration that makes the difference between a man and a machine.

Union Holding Off Organizing Campaign In West Va. Fields

Writing from Charleston, W. Va., a
correspondent of the Chicago Black
Diamond says that so far as there are
any visible indications, the United
Mine Workers' organization has
taken no active steps so far to bring
non-union miners into the union fold,
as announced at a recent meeting at
Lafayette, so that the labor status of
a great many miners in the state re-
mains as it was early in April.
In deference to a desire to force an ac-
ceptance of the union terms, the be-
lief is beginning to prevail that the
union has been governed by two fac-
tors and that for the time being no
real effort will be made to wage an
active organizing campaign. In the
first place it has become apparent
that the activities of the miners' union
for the time being are to be more
of a political than an organization na-
ture and that no real effort will be
made toward organization until after
the primary is over on May 27. It is
thought probable that leaders of the
union feel that they can accomplish
more if they succeed in helping to
nominate candidates of their own lik-
ing for the more important state
offices because they have understood a
candidate for governor and a candi-
date for senator and will endeavor to
line up most of their members for
such candidates.

The union leaders are supporting
Astoria General R. T. England for
the Republican nomination for the
governorship and Dr. M. V. Godby of
Charleston, for senatorship, and in-
asmuch as these candidates are
known to be friendly to the miners'
union, operators are naturally not
emporting them. From all that can
be learned the miners' union is pre-
ceding on the theory that with candi-
dates friendly to them in office they
will be able to have their own way
in whatever they may attempt. It will
be necessary, however, even in the
event that they help to nominate and
elect their choice to wait until next
March before undertaking further or-
ganization work if that be their ob-
ject.

Closing of a Three-Month Contract for Furnace Coke Only Feature of Dull Week

Sharpsville Furnace to Resume
Operation at End of Pres-
ent Month.

PRICE IS NOT DIVULGED

Occasional Spot Sales Made Around
\$2.50-\$3.00; Foundry Demand Still
Poor; Standard Grades \$4.00-\$5.00;
Less Hope of Early Revival in Steel.

Special to The Weekly Courier
PITTSBURGH, May 21.—The
market has shown little change in
general position as to dullness, except
for an incident that stands out promi-
nently on account of the death of de-
velopments, the practical closing of a
three-month contract for furnace
coke. As to prices they are merely
quotable a shade lower on both fur-
nace and foundry coke, representing a
continuance of the slow yielding that
has been going on for an almost in-
definite time.

It is announced that the merchant
stock of the Sharpsville Furnace Com-
pany, in the Shenango Valley, will
blow in at the end of this month and
it is inferred that its coke supply
under negotiations lately has been
closed for the three months of June
July and August, involving 10,000
tons a month. The furnace com-
pany had a contract for that quarter, but
with prospective dullness it did not
contract for second quarter when
many furnaces were doing so. About
half the furnaces that contracted for
the present quarter have since blown
out, shipments on the contracts be-
ing correspondingly suspended, ex-
cept that in one case the coke was
sold to another furnace interest. Now
Sharpsville furnace, which did not
contract, is about to blow in. The
price done on the contract is under-
stood to have been in the neighbor-
hood of \$3.50, but the exact price is
not divulged.

There is a spot furnace coke
market but it is not made to any ex-
tent by sales to blast furnaces, as the
blast furnaces are well provided and
rarely have any occasion to buy in the
spot market. There is a very small
tonnage of free furnace coke in the
market, and it generally has to go to
miscellaneous buyers, including gas

makers. This furnaces market prices
though the tonnage involved are so
small that if there were any regular
demand by blast furnaces, in ordinary
quantities, the prices would un-
doubtedly not be so low, as operators
are indisposed to make coke to sell
at present prices. The coke offered
at present prices, the coke offered
arises from ovens not blowing out in
exact harmony with the discontinu-
ance of contract shipments, by a little
48-hour coke being made as a neces-
sity in connection with the produc-
tion of a larger quantity of regular
foundry coke and in other like ways.
Such coke has to be disposed of re-
spective of whether the price in-
volves a loss or not.

Occasional sales of very good fur-
nace coke have been made at \$3.50
and even a loss and \$3.00 seems to
be the highest that would have to be
paid, with demand as limited as it has
lately been. The market is quotable
in this range, against \$4.00 to \$3.75 a
week ago.

Foundry coke has continued in poor
demand, not so much that orders are
few as that individual orders are so
small that the total tonnage actually
absorbed the production even though
production has been declining. Buyers
have been making more effort to get
lower prices, by accepting some, and
the net result is that the recent week
new in prices has developed into a
plain 25 cent decline in the past
week. Heavily standard foundry coke
does not seem to be available at less
than \$1.00, as with a large propor-
tion of the current business in de-
cline prices upward and there is a
little business done at \$1.00 only on
a few brands. An occasional produc-
er has a higher price to meet con-
tracts and gets little if any business
in the spot market. The market
is thus quotable as follows:

Spot furnace 3.50-3.75
Spot foundry 1.00-1.25

There is no prospect of any early
improvement in the iron and steel
industry, which makes conditions in
the coke trade. There is somewhat
less hope of an early revival, say by
the end of July, than there was a
couple weeks ago. Buyers of steel,
who accumulated some stocks early
in the year have been liquidating
while consumption has decreased
this prolonging the time required
for this liquidation. The time will
be a revival in the general opinion
but some observers do not look
for very decided improvement until

rather late in the year.

The Pittsburgh district coal market
continues in very poor condition but
it was not lost any more ground in
the past two or three weeks. Pro-
duction is just a shade heavier than
in the first part of April. Consump-
tion is still liquidating stocks, while
consumption is lighter than in the
first three months of the year. No
large business of any consequence has
been transacted. A little coal has
been moving from the district, by lake
shippers controlling mines of their
own. Gossip is now running in the
direction that before very long some
of the union miners will be disposed
to ignore the union scale if by ac-
cepting a substantial reduction they
can help operators to give them em-
ployment by meeting prices of com-
petitive fields.

The pig iron market continues very
dull. No sales of 1-day iron of any
consequence are reported and con-
sumers seem still to be well supplied
for their reduced operations by
stocks or by shipments still coming
to them on old contracts. Furnace
stocks are considerably lighter than
three months ago so that consump-
tion has not really been poor if it
could absorb current make and also
take some from stock. There is
much discussion as to where pig iron
prices may go, some observers con-
tending that they are already below
cost others denying this or assert-
ing that furnaces may expect to make
income at times rather than go out
of the business. Bessemer and found-
ry are quotable off 50 cents from
former quotations while the quota-
tion on basic iron is regarded as
practically normal, figures being as
follows:

Bessemer 22.00
Basic 21.00
You try 21.00

These prices are for 60 lb. Vally
furnace freight to Pittsburgh being
\$1.75.

**"ATTENTION" Patrons of
Peoples Ice Company**

Through this advertisement, we wish to thank you for
your patronage during the past years of our business career in
this city.

The gas and coal man can afford rest now for they had a
very good season.

So we wish to state as the ice season is here. That Quali-
ty and Service are the two main things to be considered in the
selecting of your ice man for the year. Try us this season. You
will find our ice of the highest quality and our service unpar-
passed. Because we have been very careful to select employes
of good clean type who have had from three to 10 years of ice
experience, and will do their best to give you prompt delivery
and courteous treatment. We deliver in all parts of the city
and its environs at as near a regular hour as possible.

FIVE THINGS TO REMEMBER

- 1—Our ice is manufactured by L. N. Hagan Co. of this city,
who has installed new equipment this spring that will add 10
tons more a day to their output—making a total of 50 tons a
day which will be a great advantage to us and our patrons.
- 2—All our trucks are painted Orange color, so that no
peddler can tell you that he is one of our men.
- 3—If our drivers fail to give you good service, report your
grievance to the office at once.
- 4—Place our card in your window early, so to make sure
you get your ice when our driver passes your home.
- 5—Our phone numbers are: Bell 369; Tri-State 80.

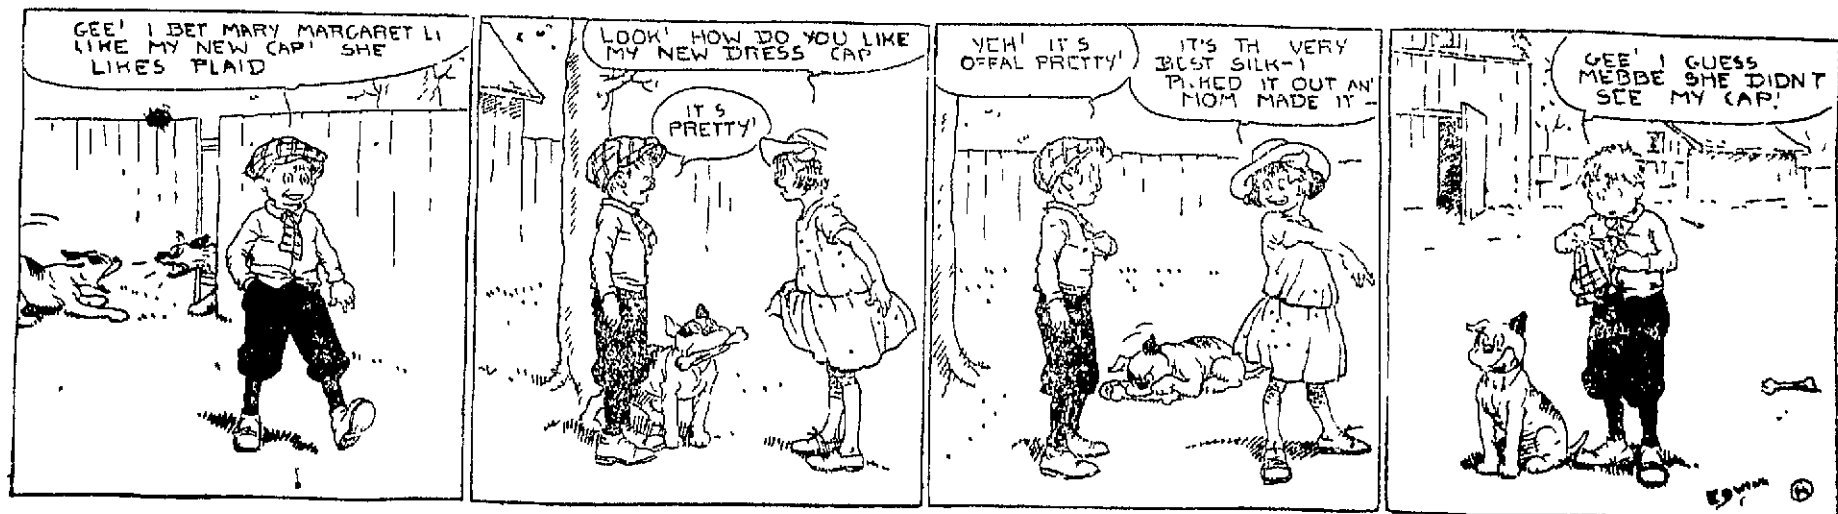

Peoples Ice Co.
Bell 369. Tri-State 80.

The New P E E R L E S S

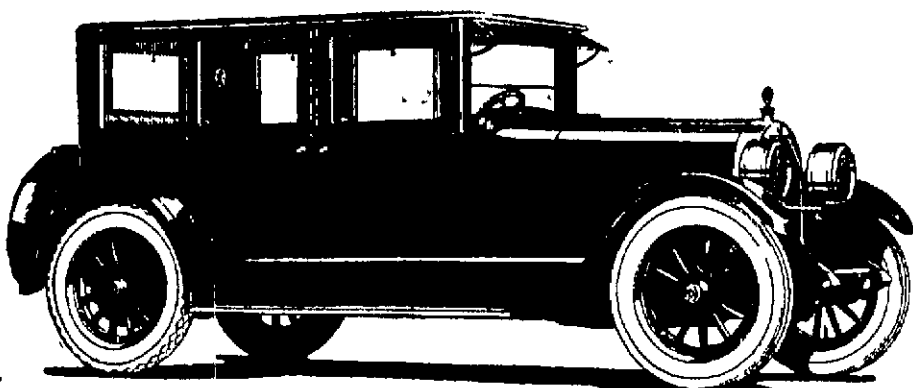

The New Peerless Six is the car you have been waiting to buy. It is a car for the man of moderate means—not a cheap car, but one that embodies all the remarkable characteristics of the Peerless Eight and yet is sold at a price that is as low as many other cars that cannot equal its performance. The engine is of exclusive Peerless design and delivers 70 horse power. The hydraulic four wheel brakes and balloon tires are in step with the most recent achievements in the motor world. Beautiful in every detail, roomy as only a big, comfortable car can be. Silent, smooth running and easy riding—truly an ideal car. See it today in our display room or ask for a demonstration.

AUTO REPAIRING NO LONGER STREET SCENE

Modern Methods Obviate Need for Testing Accuracy of Repairs and Adjustments on Streets—New Ways of Testing Cars Largest Result of Improvements in Design.

By WILLIAM ULLMAN.

No more is it necessary to try the way to find with trouble. Any car out after repairs or adjustments has been made, and no more is it justifiable to endanger the lives of others by running around town with a mechanic perched on the running board.

This is the springtime message to the repairers. Others can and should be given by the owners before they drive away. There was a time when the motor car manufacturers thought there was no way to tell whether a car was put together properly except by taking it out on the road and testing it at a time when all attention should be given to the matter of driving the car.

Many of these tests are given by the repairers. Others can and should be given by the owners before they drive away. There was a time when the motor car manufacturers thought there was no way to tell whether a car was put together properly except by taking it out on the road and testing it at a time when all attention should be given to the matter of driving the car.

This idea is rapidly gaining headway in the automobile service stations and repair shops. It is getting to be rather rare to see car owners driving about while adjustments are being made, and it is just as unnecessary as it is rare. Much of this is due to the vast improvement in the automobile itself.

Take the matter of carburetor adjustment, for instance. There was a time when to touch the carburetor

was to flirt with trouble. Any adjustment that was made usually required the services of an experienced mechanic who, lying on the running board, would turn the adjustments gingerly while the owner kept the car on the move.

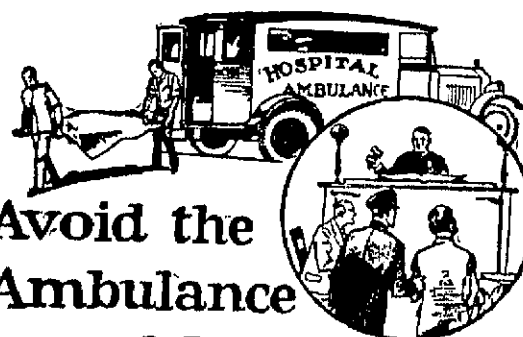

Much of this gentle handling of the carburetor was done as a precaution against a stall, for a stall in the old days was a problem in itself. Nowadays one can stall and stall, knowing well enough that if the battery is in reasonably good condition the self-starter will start the engine again.

Thus in adjusting a carburetor today it makes little difference whether the mechanic turns for too rich or too lean a mixture. With the aid of the starter-motor he can actually make a dozen mistakes in a fraction of the time it used to require to adjust the carburetor accurately.

But there is no reason why he should make any mistakes. Carburetors are more accurate in their adjustment. Some of them have but one adjusting screw, while others may have two or three which may not require attention. Five notches to the right or the left as the case may be and the instrument is "dead." So many notches back again and she is ready for work. No mystery about it.

Times have changed with respect to the servicing of cars, and if you are still driving around with mechanical aboard it is a foregone conclusion that you are not fully alive to the

(Continued on Next Page)

Avoid the Ambulance and Police Court

Courts of law recognize no excuse for faulty brakes. . . Better have the brakes attended to before, not after the accident. Maybe your brakes need adjusting or new brake lining. Let us look them over. There is no charge for inspection.

We are brake experts. We specialize in this branch of service. Our organization is splendidly equipped to render prompt service—we'll line your brakes with Raybestos while you wait.

Connellsville, Pa.

Who Washes Your Car?

When your car needs overhauled you don't give it to some amateur to repair. You give it to the best man you can get at the time. Then why do you leave anyone wash your car? The paint is scratched and the lustre removed in no time at all unless the washer knows how to do the work. Washing cars is our business—and we do it the year 'round. Give us a job and let us show you what we can do.

City Auto Laundry

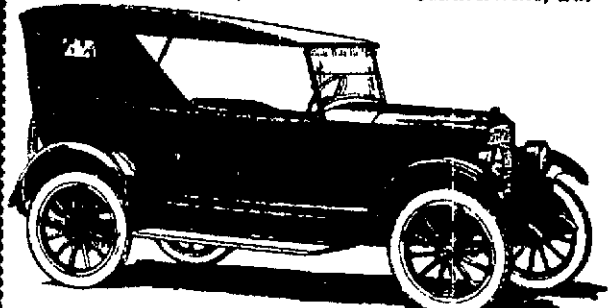

The Simonizing Station.
111 Baldwin Ave. Tri-State 674-W. Connellsville, Pa.

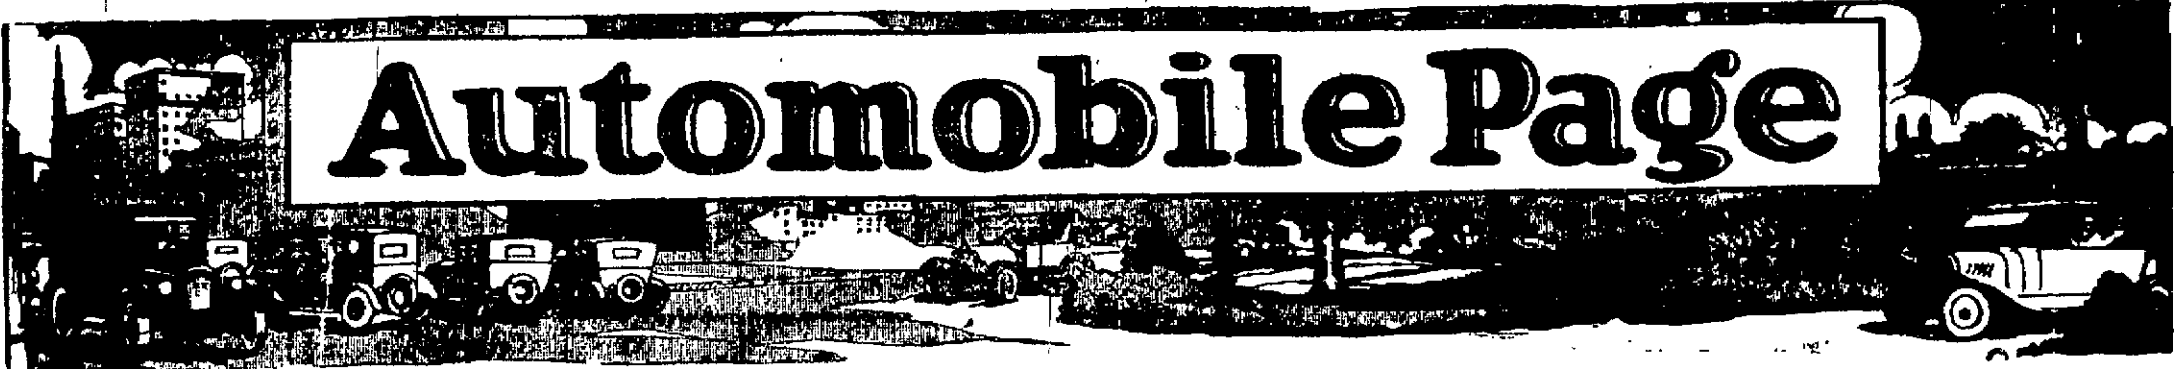

When purchasing a STAR CAR you are getting more value for the amount of money spent than you would get in any other car on the market. The STAR CAR is sold at the "flivver" price—but it is a high grade car. Stop at the garage some day and make a thorough examination; it will surprise you to see parts in the STAR that you thought were only in the highest priced cars. It don't take a whole lot of money to buy a STAR CAR nor a whole lot to keep it going.

White-Lyons Motor Co.

Foot of West Side Hill
West Crawford Ave., Connellsville, Pa.

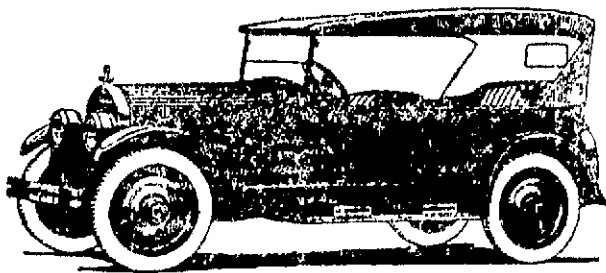

"A Wonderful Car" Is the Verdict

Ask any Durant owner what he thinks of the Durant and he'll begin to sing its praises. For even the owners are surprised at the performance of the Durant. They are sold at a popular price—one that appeals to people in every walk of life. The cost of maintenance is lower than on most cars in its class—and the engine has power enough to suit the most exacting. No matter what kind of a car you have been driving you'll be amazed when you get back of the wheel of a Durant; see how easily it steers and how quickly it responds to the slightest touch of the accelerator. We gladly demonstrate.

White-Lyons Motor Co.

Foot of West Side Hill, Connellsville, Pa.
West Crawford Avenue.

The Best Is Cheapest in the Long Run

\$1,495
Delivered.

How often have you heard some one make that remark after buying an article because it was cheap. It never pays. The best is the cheapest in the long run whether you are buying an automobile or a pair of shoes.

We're not saying this because the Flint is a high priced car—for it isn't. We are saying it for the benefit of those people who are considering buying a car in the same price class as the Flint, but which may be a few dollars cheaper.

If its cheaper priced than the Flint there's a mighty good reason. For it is impossible to build a car equal to the Flint for less money. We are not afraid of comparison with cars priced as high as \$2700.

Come in and ask for a demonstration, or better still, call us any time you're ready—we'll gladly demonstrate.

United Motor Co.

AUTO REPAIRING NO LONGER STREET SCENE

(Continued from Preceding Page)
changes that have taken place in cars and their use.

It is a waste of time to drive the car up a steep hill to see whether the clutch is slipping. By locking the brakes and allowing the clutch to engage while the engine is running and the car in low gear the condition of the clutch is easily ascertained. If the engine does not immediately stall the clutch is slipping and should be adjusted until it will show results by this test.

By this time both mechanics and car owners should be better judges of the exact location of annoying body and chassis noises. Much of the effect of road use of the car can be had by standing on the running board and rocking the car, but even this is unnecessary. The more modern method is to put a little oil in every possible body joint that might squeak and inspect the chassis. Invariably this method reveals the car as requiring more than mere removal of squeaks.

It used to be the rule to take a road test with the car out wide open as a means of determining whether the engine was firing on all four. Now the service station will get a line on all eight without leaving the shop. And the motorist can do the same. If he wants to make sure everything is all right before he pays the bill.

While there is still the necessity for "shorting" the plugs in order to tell which one is misfiring the motorist who has no particular aptitude for mechanics does not have to go very far to decide whether the engine is firing on all six or all eight. He can get a very good line on the situation by testing for vibration. Some of the lights will now show no appreciable period of vibration, and this is true of a great many of the sizes. Where this is the case a metal pencil should remain standing on end on the radiator.

ator cap or front end of the hood while the engine is being run at various speeds.

Suppose one plug is bad in such a balanced eight motor. Even to the trained ear the power plant will seem to be ticking it off in perfect style. The engine will accelerate at command and there will be no suggestion of trouble. Even if the owner took the car out on the street he would never notice the difference until he started up a steep hill. But just let him try to balance the pencil. With the engine running on only seven there will be just enough vibration to suggest some sort of mis-firing.

Recently in the case of a six the spark plug points had been given too wide a clearance when removed for cleaning. The owner tried the pencil test and found that there was excessive vibration at idling speed. It was not necessary for him to run down through traffic to find out that he would not be able to run slowly in high gear without "chucking."

Engine knocks and noises are now very easily located without the necessity of taking the car out. A test used by some mechanics is to allow the engine to pull the car with the brakes so tight that it can hardly make headway. This has the effect of climbing a steep hill and will show up a bearing knock in a minute.

Another test that will show up a piston ring is to "short" a plug and then quickly remove the screw-driver so that the plug can fire the exact moment it should. This will jar the respective piston enough to reveal any excessive clearance.

After grinding in valves the expert repairer does not send the owner off to find out "how it runs." He warms up the engine and then, with hand crank and high ignition off he tests for compression.

Your Radiator May Be the Cause

Your Radiator may be the cause of your engine troubles. Let our men inspect your radiator and they'll tell you in a jiffy just what your trouble is. That's our business and that's what we take pride in. If it needs repaired we can do it better than most and as cheaply as any.

Another specialty of ours is welding. We do both oxy-acetylene and electric welding. Anything welded by us is as strong and sturdy as it ever was. Ask anyone who has had welding done here—they are our best recommendation. No job is too large or too small for us to undertake. Give us a chance to show what we can do the next time you have any welding to be done.

Buy Your New Car Now!

The Good MAXWELL

The following cars are to be sold at

\$100

less than the list price.

Maxwell Touring

Maxwell Club Coupe

Maxwell Club Sedan

Maxwell Sport Touring

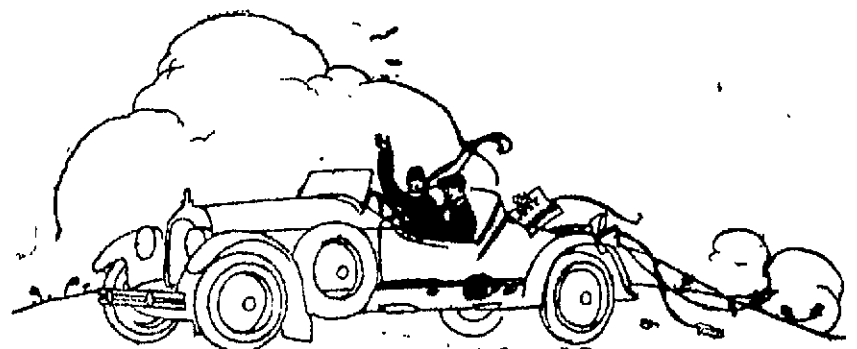

The Reason:

We have decided to give up our automobile agency, and to sell all cars that we had stocked at \$100.00 less than list price. It's a loss for us—but an opportunity for you. If you are in the market for a car—or expect to be in the market for a car—you'll be money ahead if you see the Good Maxwell before buying. They are a strong, sturdy car, attractive in design and with an exceptionally powerful motor. Ask or call for a demonstration.

Connellsville Service Co.

West Crawford Avenue,

Connellsville, Pa.

No Matter Where You Go

you'll still be in direct touch with the world if you take a radio with you. That's what many are doing. Newlyweds, taking their honeymoon in an automobile carry a radio to keep them in touch. Vacationists, too, will be using the radio to a far greater extent this year than ever before. It enables them to enjoy the world's greatest artists, the most popular orchestras, hear famous lecturers and to listen to the sermon of your favorite minister on Sundays when you are unable to go to church. Then the kiddies enjoy Bed Time Stories and the weather report tells you whether it will rain or shine tomorrow; if it is safe to drive on the pikes or to stay in your present camp.

We are featuring the Radiola and the Kennedy. Of the two the Radiola is possibly the best known but the Kennedy is an exceptional machine. No matter which one you select all that is necessary is to sit it in the car, using an indoor aerial, tune in whatever station you desire and have it when you want it, day or night. Priced as low as \$35. Ask for a demonstration.
